

Fuji

FA-70 Series Angle Grinders

- **High Power - 1800W**
- **Extended Service Life**
- **Ergonomic and Easy-to-use**

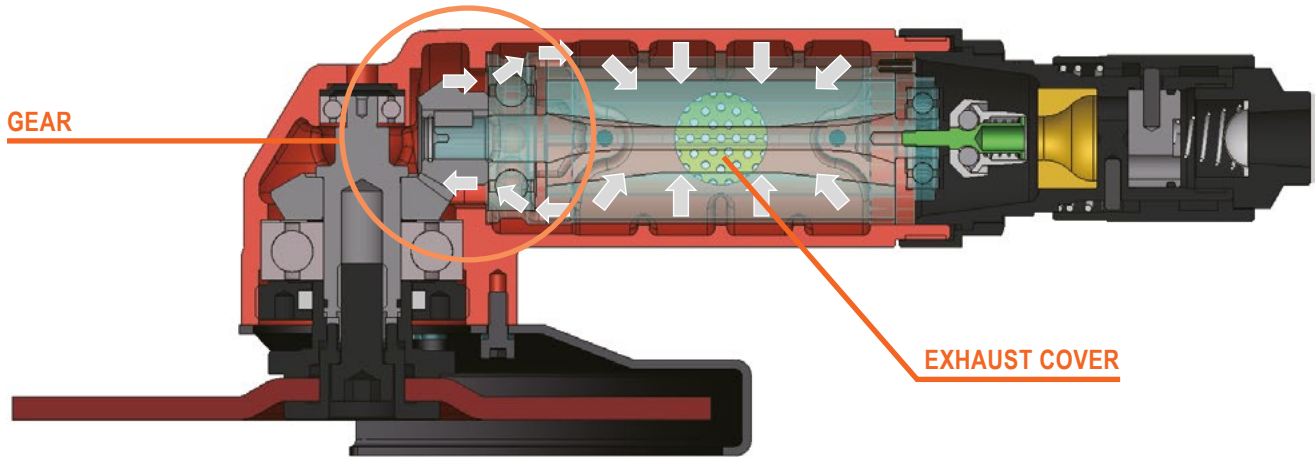

The FA-70 series from Fuji is a powerful 7" Angle Grinder with 1800W output. Thanks to the extremely high power and durable design, the FA-70 series is ideal for all heavy duty applications performed in shipyards, mining & construction, foundries and general metalworking.

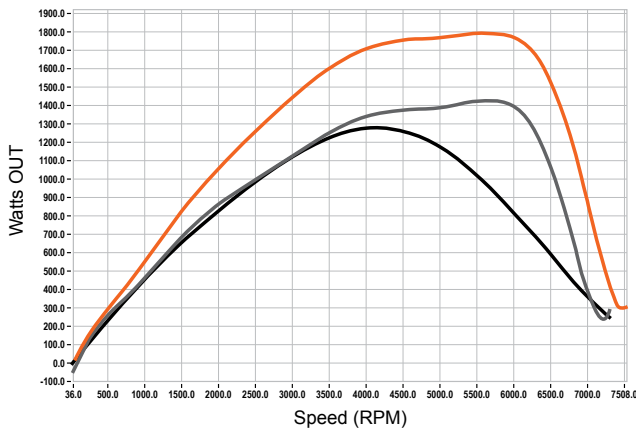

FA-70 SERIES ANGLE GRINDERS

FEATURES & BENEFITS

- Extremely high power thanks to the newly designed motor and optimization of air exhaust
- Cooling effect on the gears part by air flow: Extended service life of the gear
- Higher stiffness reduces vibration levels: Operator comfort
- Side handle is available both for right/left handed operator : Ergonomic and versatile design
- Suitable for use with aggressive abrasives: Maximum removal rate

POWER COMPARISON VERSUS COMPETITORS' TOOLS

- FA-70-2
- Competitor A
- Competitor B

Condition of comparison test

Air pressure: 0.63 MPa / Hose size: Ø12.7mm (1/2inch) x 6m
 Nipples: Nitto Koki 400PM + FUJI IB-304000
 Measuring instrument: MAGTROL HD-800-6N
